

QUALITY POLICY

We provide rehabilitation services, maintenance and construction in different kind of industries through a management quality system. We guarantee customer satisfaction to fully meeting your requirements generating a compromise continuous improvement always seeking the benefit of the community and its environment.

MISSION

We are a company that manages construction projects and industrial maintenance dedicated to meet the degree of excellence of our customers, creating value through integrated solutions that ensure the quality and the respect for the environment, on the basis of compliance the commitments and high performance of our teams.

VISION

Be recognized in the nation in general as leaders in the construction and industrial maintenance and be recognized in foreign countries for excellence and operational quality.

WORK VALUES

- Communication
- Discipline
- Respect
- Responsibility
- Teamwork

ENTALPIA CONSTRUCCIONES, S.A. DE C.V.

A SAFE AND RELIABLE COMPANY

WE ARE SPECIALIZED IN:

- Maintenance of process equipment in industrial plants.
- Integral maintenance of distillation towers.
- Maintenance and installation of internal trays in distillation towers.
- Integral maintenance of heat exchangers.
- Integral maintenance of pressure vessels and reactors.
- Overhaul internals maintenance of reactors including downloading, screening and catalyst loading.
- Construction and overhaul maintenance of Storage Tanks.
- Cleaning hydrodynamic high-pressure equipment up to 20,000 PSI
- Abrasive cleaning and anti-corrosion coatings application.
- Integral maintenance of reactors, towers, vessels, heat exchanger and fired heaters.

- Construction and maintenance of industrial plants.
- Fabrication and assemble of steel structures.
- Buildings and civil engineering works.
- Earthmoving works.
- Hydraulic concrete pavements works.
- Services of technical supervision.
- Rental / Sales of shoring and scaffolding systems.

CONSTRUCTION AND MAINTENANCE OF PROCESS EQUIPMENT IN INDUSTRIAL PLANTS:

- Refineries.
- Petrochemical plants.
- Thermoelectric.
- Steam generators.
- Oil pipelines.
- Buildings.
- Fire protection systems.
- Steel structures manufacture.
- Storage tanks.

INTEGRAL MAINTENANCE OF REACTORS, TOWERS, VESSELS, HEAT EXCHANGER AND FIRED HEATHERS:

- Installation of internals in distillation towers (internal trays, random packing, Sulzer's Mellapak, etc.), vessels and reactors.
- Installation and restoration of process equipment.
- Maintenance of internals of reactors and vessels (fitting & welding works).
- Overhaul internals maintenance of reactors including catalyst download, screening, packing, labeling and catalyst load.
- Integral maintenance of reactors: Hydrodesulfuration, Reformer of Gasoline, Isomerization, Alkylation and sulfur recovery unit plants.
- Overhaul maintenance of fired heaters.
- Integral maintenance of tubular heat exchanger and air cooling.

CLEANING HYDRODYNAMIC HIGH-PRESSURE EQUIPMENT UP TO 20,000 PSI.

ABRASIVE CLEANING AND ANTI-CORROSION COATINGS APPLICATION.

AUTOMATION, INSTRUMENT AND CONTROL SYSTEMS.

INTEGRATION OF PLC CONTROL AND SCD SYSTEMS.
